

## ADST Scope & Sequence

### Grades 4 & 5 Big Ideas & Learning Standards

#### Curricular Competencies

*Students are expected to be able to do the following:*

#### Applied Design

*Understanding context*

- Gather information about or from potential **users**

#### Defining

- Choose a design opportunity
- Identify key features or user requirements
- Identify the main objective for the design and any **constraints**

#### Ideating

- Generate potential ideas and add to others' ideas
- Screen ideas against the objective and constraints
- Choose an idea to pursue

#### Prototyping

- Outline a general plan, identifying tools and materials
- Construct a first version of the **product**, making changes to tools, materials, and procedures as needed
- Record **iterations** of prototyping

#### Testing

- Test the product
- Gather peer feedback and inspiration
- Make changes and test again, repeating until satisfied with the product

### Available District Resources

#### Available Grades 4 & 5 Resources

Elenco Snap circuits kits

Spheros

Edison robots

Cubelets

### Grades 4 & 5 Content & Computational Thinking

#### CONTENT

*Students are expected to use the learning standards for Curricular Competencies from Applied Design, Skills, and Technologies 4–5 in combination with grade-level content from other areas of learning in cross-curricular activities to develop foundational mindsets and skills in design thinking and making.*

#### Data

- Identify the variables/values of a given set of data.

#### Patterns

- Identify a problem that can be solved computationally.

#### Algorithms

- Identify syntax and logic structures.
- Translate information into computational structures (logic blocks and/or code).
- Modify and revise an algorithm to reach a desired outcome.

#### Digital Citizenship

- Proper use of the technology

Grades 4 & 5

## Curricular Competencies (continued)

### **Making**

- Construct the final product, incorporating planned changes

### **Sharing**

- Decide on how and with whom to **share** their product
- Demonstrate their product and describe their process
- Determine whether their product meets the objective and contributes to the individual, family, community, and/or environment
- Reflect on their design thinking and processes, and their ability to work effectively both as individuals and collaboratively in a group, including their ability to share and maintain a co-operative work space
- Identify new design issues

### **Applied Skills**

- Use materials, tools, and technologies in a safe manner, and with an awareness of the safety of others, in both physical and digital environments
- Identify the skills required for a task and develop those skills as needed

### **Applied Technologies**

- Use familiar tools and **technologies** to extend their capabilities when completing a task
- Choose appropriate technologies to use for specific tasks
- Demonstrate a willingness to learn new technologies as needed

## Available Grades 4 & 5 Resources

Elenco Snap circuits  
kits

Spheros

Edison robots

Cubelets

## Curricular Competencies – Elaborations

- **users:** may include self, peers, younger children, family or community members, customers, plants, or animals
- **Defining:** setting parameters
- **constraints:** limiting factors such as task or user requirements, materials, expense, environmental impact, issues of appropriation, and knowledge that is considered sacred
- **Ideating:** forming ideas or concepts
- **product:** for example, a physical product, a process, a system, a service, or a designed environment
- **iterations:** repetitions of a process with the aim of approaching a desired result
- **share:** may include showing to others, use by others, giving away, or marketing and selling
- **technologies:** things that extend human capabilities
