

What is Heavy Metal Rocks?

Heavy Metal Rocks is a project that provides students in grades 11 & 12 opportunities to explore the wide variety of rewarding career choices as heavy duty equipment operators in the construction, natural resources and logging industries. The project is in partnership with Taseko/Gibraltar Mines, Tolko, West Fraser, Ministry of Transportation and Infrastructure and a number of other businesses, suppliers, and service groups in our community.

"This is a great opportunity for industry to encourage students into careers in skilled trades."

K.W. Journeyman Power Line Technician

Providing Students an Opportunity to Experience Their Future

Heavy Duty Industry
